For feedback or suggestions, contact us audible.com/help or on @audible_ com Twitter. i use it every day . Recent updates for your newest upgrade to your app. I absolutely love the fact that I can put the book into the collection. I think it's probably one of the biggest improvements to the up-to-day schedule! So thank you!! Having said that after a bunch of update changes they have changed a lot of things as it's fun to work with or use. I literally live off this app, because I'm completely disabled and that's the only way I can get it throughout the day without going crazy 99% of the time. Please forget this new clip. Why would anyone want this? Go back to public signs. And every time you get intense updates like this, I loosen all my books that have not been downloaded to my device for like a week. It's getting ridiculous. I shouldn't relax my books every time you update! So once again I only have 25 books, and I have to figure out how to get 225 books back, unless you guys do another update and I miraculously bring them back or after I just get them back, I'll loosen them up again. Please fix all of these errors. And maybe, just maybe, you should send surveys to all your customers to see if they even want these crazy things you think we'll change before you take our perfectly acceptable signs to the clip. Or, if you want to keep them both for the sake of heaven, separate them. They're so incongregable to keep together. There's something very different about the experience of hearing a good bedtime story, a radio play, an animated speech, a heartfelt song or a well-delivered theatrical monologue (even when comedic) monologue. The human voice is a surprise. It communicates deeply and moves you, excises you or stimulates your curiosity in ways that other media might not. Audible is valuable not only for serious book lovers, but also for travelers, insomnia, adding readers and students of all kinds as well. Audible has enabled me to enjoy countless classics, fantasies, and I have told stories and nonfiction works so well that I have neither time nor attention spans to read as text. Sometimes I find myself able to start, continue reading, or end a book that I know I really need to read. This app (along with the amazing voice actors who only trade through it) saved my life, boosted my soul, enriched my mind and put me to sleep on many anxiously ridden nights. Sometimes a well-read book is the only thing that can save me from the relentless jukebox of my own mind. Sometimes Someone else's experiences are just what I need in order to connect and expand on who I am or who I want what a gift . I absolutely love my audible schedule!! I'm an avid listener & overall have not had any issues. When I buy a book it automatically (within seconds) appears in my library to download that excellent transfer time. My only minor complaint is that when I use bedtime and turn it off before the time runs out, it always goes to sleep 2 minutes after I turn off the rest time. I turn off The Tucker because I want to keep listening without bedtime. Yes I know two minutes is a minor issue but it can be very annoying waiting for the story to stop at 2mins so I can restart the game! So appreciate the fix in the next update. My thought in the new update is a way to arrange our library. Now they are arranged by purchase date until you listen & then listen it newest. I like the ability separated by the author, type, book series etc. Something like that would be great for finding old favorites, even a better idea... If you can develop alerts to let readers know that publishing new books in our series already exists! Once you have a great library it's hard to remember what books await yourself in the next series! It will definitely increase my already long list of purchases. Generally great work! I always recommend! Just fix the 2mins turn off glitch when I turn OFF timer (before it runs out) & please consider library organization ideas! Web developer app supports everyone's privacy policy. I thought I'd take an audible test since I'm on a long commute now. I bought a book. I downloaded it to my iOS device in the app. He's not playing. Speaks about the need for device permissions. Spend a bunch of time with audible technology support today and they're still listening to why I can't listen to an audiobook I bought. Are you crazy about this? How'd it work out? I am now quite disappointed with it. Thanks.Page 2 27 comments comments
